

Medical Opinion (Complete) Disability Benefits Questionnaire

Name of Veteran/Service Member: XXXXXXXXXXXXXXXXXXXX	SSN: XXXX
Date: 08/26/2013	VA Claim Number: XXXXXXXXX
Contractor: VES	VES Number: XXXXXXXXX

The Veteran is applying to the U.S. Department of Veterans Affairs (VA) for disability benefits. VA will consider the information you provide on this questionnaire as part of their evaluation in processing the Veteran's claim.

For the Claimed Compensation Condition of - EYE CONDITION

1. Definitions

Aggravation of preexisting nonservice-connected disabilities. A preexisting injury or disease will be considered to have been aggravated by active military, naval, or air service, where there is an increase in disability during such service, unless there is a specific finding that the increase in disability is due to the natural progress of the disease.

Aggravation of nonservice-connected disabilities. Any increase in severity of a nonservice-connected disease or injury that is proximately due to or the result of a service-connected disease or injury, and not due to the natural progress of the nonservice-connected disease, will be service connected.

2. Restatement of requested opinion

a. Insert requested opinion from general remarks:

Please complete section four and the evidence review in the medical opinion DBQ and state whether the veteran's vision problems and headaches, if found, was at least as likely as not (50 percent or greater probability) incurred in or caused by the claimed brain tumor that occurred in service.

b. Indicate type of exam for which opinion has been requested (e.g. Skin Diseases):

EYES

3. Evidence review

Was the Veteran's VA claims file reviewed?

Yes No

If yes, list any records that were reviewed but were not included in the Veteran's VA claims file:

If no, check all records reviewed:

- Military service treatment records
- Military service personnel records
- Military enlistment examination
- Military separation examination
- Military post-deployment questionnaire
- Department of Defense Form 214 Separation Documents
- Veterans Health Administration medical records (VA treatment records)
- Civilian medical records
- Interviews with collateral witnesses (family and others who have known the veteran before and after military service)
- No records were reviewed
- Other:

Complete only the sections below that you are asked to complete in the Medical Opinion DBQ request.

4. Medical opinion for direct service connection

Choose the statement that most closely approximates the etiology of the claimed condition.

a. The claimed condition was at least as likely as not (50 percent or greater probability) incurred in or caused by the claimed in-service injury, event, or illness.

Provide rationale in section c.

b. The claimed condition was less likely than not (less than 50 percent probability) incurred in or caused by the claimed in-service injury, event, or illness.

Provide rationale in section c.

c. Rationale:

Veteran states his last eye exam was in 1996
Veteran's records indicate an examination was done on March 19, 1996 in which there is a referral for Neurologist evaluation due to the veteran complaining of headache starting on left side of head. There is no follow up records available for review after the 3/19/1996 report. There is no record available stating that the Veteran has a brain tumor. Veteran has had MRI and CT scans that have shown no brain tumors.
Veteran reports at today's examination with a history of headaches starting a year ago that occur about twice a month lasting for 15 to 20 minutes in which left side vision becomes blurry for a few minutes during the headaches; Veteran has had MRI and CT scans that have shown no brain tumors. He states that there was a time when doctors were concerned about a brain tumor but was told it was just an abnormality in the development of some part of the brain but it was not a tumor.

5. Medical opinion for secondary service connection

a. The claimed condition is at least as likely as not (50 percent or greater probability) proximately due to or the result of the Veteran's service connected condition.

Provide rationale in section c.

b. The claimed condition is less likely than not (less than 50 percent probability) proximately due to or the result of the Veteran's service connected condition.

Provide rationale in section c.

c. Rationale:

6. Medical opinion for aggravation of a condition that existed prior to service

a. The claimed condition, which clearly and unmistakably existed prior to service, was aggravated beyond its natural progression by an in-service injury, event, or illness.

Provide rationale in section c.

b. The claimed condition, which clearly and unmistakably existed prior to service, was clearly and unmistakable not aggravated beyond its natural progression by an in-service injury, event, or illness.

Provide rationale in section c.

c. Rationale:

7. Medical opinion for aggravation of a nonservice connected condition by a service connected condition

a. Can you determine a baseline level of severity of (claimed condition/diagnosis) based upon medical evidence available prior to aggravation or the earliest medical evidence following aggravation by (service connected condition)?

Yes No

If "Yes" to question 7a, answer the following:

Describe the baseline level of severity of (claimed condition/diagnosis) based upon medical evidence available prior to aggravation or the earliest medical evidence following aggravation by (service connected condition):

Provide the date and nature of the medical evidence used to provide the baseline:

Is the current severity of the (claimed condition/diagnosis) greater than the baseline?

Yes No

If yes, was the Veteran's (claimed condition/diagnosis) at least as likely as not aggravated beyond its natural progression by (insert "service connected condition")?

Yes (provide rationale in section b.)

No (provide rationale in section b.)

If "No" to question 7a, answer the following:

i. Provide rationale as to why a baseline cannot be established (e.g. medical evidence is not sufficient to support a determination of baseline level of severity):

ii. Regardless of an established baseline, was the Veteran's (claimed condition/diagnosis) at least as likely as not aggravated beyond its natural progression by (insert "service connected condition")?

Yes (provide rationale in section b.)

No (provide rationale in section b.)

b. Provide rationale:

8. Opinion regarding conflicting medical evidence

I have reviewed the conflicting medical evidence and am providing the following opinion:
